As we are wrapping up 2019 and preparing for 2020, think about updating your record of 4-H activities each month to help ease the pain of assembling record books in the fall. Be sure to think about which activities you are participating in that are related to your specific projects. There are many community service activities being coordinated, be sure to make note of your efforts for your record book now.

Just a quick note of change. At the leaders meeting at the end of October, it was decided that 7 and 8 year olds will switch to the KAP form for 7 and 8 year olds instead of using the Junior Achievement Form that has been used in the past. We will review these forms at the Record Keeping Workshop and the updated forms will be posted to the website soon.

I hope each of you have a joyous holiday season to spend time with those you love!

Shandii’s Tip of the Month

KAP’s in 2020

Late fall or early winter is a good time to service power equipment such as mowers, tillers and garden tractors. Run the equipment out of gas or treat the existing gas with a stabilizer as untreated gas can deteriorate over time. If using a stabilizer, run the engine long enough for untreated gas in the carburetor bowl to be burned and replaced. This is also a good time to replace the oil (and filter, if present) since the engine is warm. Check and replace the spark plug if necessary. Some gardeners will also apply a light, sprayable oil into the cylinder through the spark plug hole. Check and clean air filters and replace if necessary. Many mowers and tillers will have a foam prefilter that can become filthy with use. If allowed to become too dirty, engines will run poorly or may not run at all.

Sharpen blades, clean tines, tighten screws, replace broken parts and do all the other things needed to keep equipment in good shape. Though such maintenance takes some time and effort, it pays for itself by reducing frustration and lost time due to poorly performing equipment during a hectic spring.
